

Declaration of Albert Siu, M.D.

In The Matter of Linda Adanalian

I, Albert Siu, M.D., declare as follows:

1. I am the forensic pathologist who conducted the forensic medical investigation into Ms. Linda Adanalian's death. After extensive inquiry and analysis, I determined that Ms. Adanalian's death was due to acute selenium toxicity.

2. It is my opinion that a law enforcement investigation is now necessary to determine how Ms. Adanalian was exposed to selenium.

3. I have discussed this with the County's Chief Forensic Pathologist and he is in agreement with my conclusion and the need for an investigation.

4. The foregoing is true and correct and if called as a witness, I could competently testify thereto.

Executed on September 24, 2001.

Albert Siu, MD
Albert Siu, M.D.
